Basic operating instructions

① Powering on

First install a micro SD card into the device. Press and hold the power button to turn the device on. The blue light will flash 3 times. The device will automatically power off after 1 minute of inactivity if not recording.

② Powering Off

Press and hold the power button to turn the device on. The power button LED will blink 3 times before shutting down.

③ Video Rotating

Make sure that you have pressed the video rotate button if you have flipped the lens to a different orientation.

WiFi operating instructions

① Turn on WiFi

Press and hold Rotate/Wifi button to turn on WiFi.

WiFi is on and enabled when you see the WiFi LED on.

② Turn off WiFi

Press and hold the Rotate/Wifi button until the WiFi LED turns off.

When the WiFi is enabled, simply open your phones network settings and connect to the network that starts with CS. There is no password for this network. Now open up the phone app and you will be automatically connected and can control your camera. You will need to enable all permissions on the app during the install process to ensure it works properly.

▶ Connecting to a computer

Simply turn the device on and plug it into your computer using the included USB cable. It will show up as a removable device in My Computer/This PC.

▶ Resetting

To reset the device press and hold the power button for 10 seconds. Once reset, the device will automatically turn off. No data will be lost if you reset the device with an SD card inserted.
